

SOS1001 FAUCET PART SPRAYER

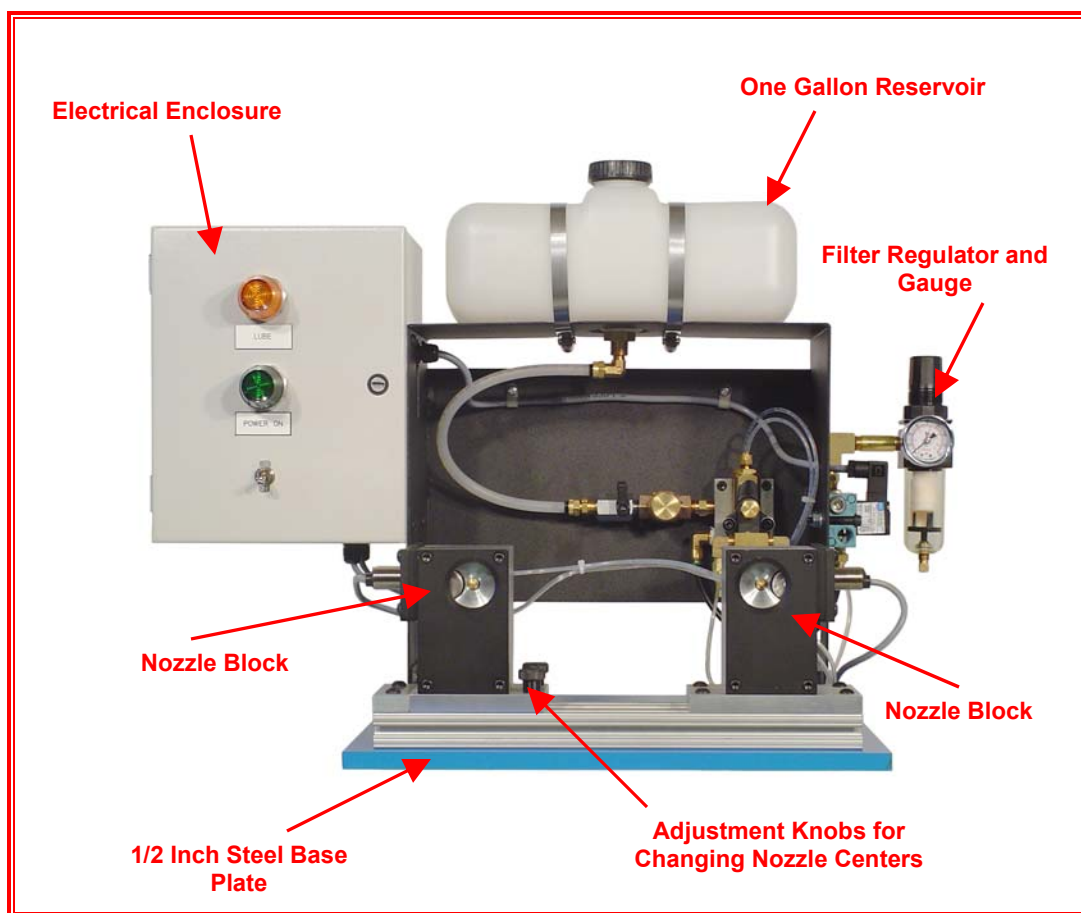

RELIABLE

EFFECTIVE

CLEAN

Sprays heavy silicon lubricant into faucet cavities during assembly

- Nozzles are engineered to spray a hollow cone pattern
- Measuring dispensers are adjustable from .001 to .004 cubic inch
- Reservoir holds up to one gallon of liquid lubricant
- Nozzle block can be set to 4" centers or 8" centers for various faucet parts
- Inductive proximity sensors recognize part insertion into nest
- Nozzles are designed for viscous silicon lubricant
- Positive displacement dispensing is dependable and repeatable
- Requires 220 V.A.C. 50/60 Hz. and "shop" compressed air
- Has power on light and lube light
- Compressed air filter-regulator with gauge is included

G. P. Reeves Inc. has been designing and building production grease dispensers and conveyor lubricators since 1971. Our patented flow sensors and air purge grease pumps are specified and used by major automotive suppliers. The sprayer shown above is an example of our capabilities. We welcome your inquiries.
